

Photo Edit

feat photopea & Ansel Adams

INTRO

Ansel Adams set the standard for landscape photography. His work both with a camera and in the darkroom elevated photography from snapshots and to fine art. Through his technical and visualization abilities, photographers learned to create masterful images that included drama and strong values.

This week your challenge is to edit photos that are inspired by the beauty of nature.

You'll use the directions provided to make a cool camera lens and landscape collage in www.photopea.com (our favorite free online photo editor!)

To make our image a little more Ansel Adams-like. We will take a few additional steps and turn the landscape into a black and white with strong contrast -- like Ansel did.

EXAMPLE

GRADING

Your completed edit will be graded on the following:

- Project demonstrates excellent use of proportion & blending
- Project included use of software for vector or raster editing
- Project included following steps to achieve a desired outcome
- Project was challenging and will be a good addition to the portfolio
- On time

LSNHS Art Department Academic Honesty Oath “By submitting my work I understand this means I created this artwork myself. I promise that this work is my own original artwork and not the work of another person. If my teacher needs to see my artwork in person, I understand that I may need to bring the physical item to school for verification. I also understand if my artwork is awesome, my teacher may want it for an online or in-person art show. So I should keep all my art safe and not lose/destroy it.”
